VIKTIG INFO OM BRUK

- Vekten fra innholdet i sekken skal ikke henge på stativet, men stå på bakken eller en pall.
- Stativet er ikke beregnet for stor belastning, men kun for å holde sekken åpen for fylling.
- Loopene fra storsekk henges en halv runde rundt øverste rør og så inn i krokene. På denne måten sitter loopene godt og sekken kan løsnes ved å skru opp rørfestet.
- Kjettingen i bunn benyttes for å justere bredden på stativet.
- Øverste firkantrør heves eller senkes for å tilpasse høyde.
PS! Ikke hev røret for høyt da det kan skade stativet og ikke fungere optimalt.

VEDLIKEHOLD

- Stativet er produsert i svartlakkert stål. Skade på lakk kan føre til rust på produktet. Vedlikeholdes med olje for å hindre rust.

//

IMPORTANT INFO ABOUT USE

- The weight from the content of the bag should not hang on the stand, but be on the ground or a pallet.
- The stand is not intended for heavy loads, but only to keep the bag open for filling.
- The loops from the big bag are hung half a round around the top tube and then into the hooks. In this way, the loops is fastened well and the bag can be loosened by unscrewing the pipe attachment.
- The chain at the bottom is used to adjust the width of the stand.
- The top square tube is raised or lowered to adjust the height.
PS! Do not raise the tube too high as it may damage the stand and it will not work optimally.

MAINTENANCE

- The stand is made of black lacquered steel. Damage to the surface can lead to rust on the product. Maintained with oil to prevent rust.
